Join our Citizen Science Team!

Free Training Session: July 12th, 9am-Noon

We need volunteers to join the **Capital Springs Bumble Bee Brigade!** Help us discover what bumble bee species use Capital Springs. The training session with UW Arboretum's Susan Carpenter will help us learn about bumble bee biology, life cycle, habitat, **how to find, identify, and take photos of these important native pollinators.** We will also learn how to **submit data** to the DNR's Wisconsin Aquatic and Terrestrial Resources Inventory website. All are welcome.
